Avian Bath Collection Compatible with New Valve Technology

With a sleek, minimal design and clean, contemporary lines, the Avian Bath Collection from Danze is "Style. Squared." Simplistic linear handles require the lightest of touch and integrate seamlessly in the luxury bath. Lavatory faucets feature a durable ceramic disc valve for a no-drip seal, and laminar flow for a clear, low-splash water stream. The tub and shower trim kits are fully compatible with the powerful Gerber Treysta Valve, the latest in valve technology. [CHECK OR CIRCLE #133](#)

Geberit Duofix Meets Requirements for ADA Wall-Mounted Sinks

Geberit Duofix in-wall systems for wall-hung lavatory sinks ensure safe, reliable operation of the lavatory and create an attractive look in private, as well as high-traffic areas. The systems are height-adjustable to meet accessibility or homeowner needs, especially helpful when meeting requirements for ADA wall-mounted sinks. The Geberit lavatory sink system is compatible with 2-hole, wall-hung lavatory

sink fixtures from many ceramic manufacturers. The system is field-adjustable for a wide range of fixture, supply and drain-mounting configurations; there's no need to buy a frame to "match" the sink. Mount the system in standard two-by-four or two-by-six room-height or pre-wall construction. [CHECK OR CIRCLE #134](#)

Delta Rolls Out VoicelQ Technology on Select Faucets

To address an emergent need for thoughtfully connected home technology, the Delta brand leverages Amazon Alexa and Google Assistant-enabled devices to create a smart kitchen faucet that thinks on command. Delta VoicelQ Technology provides dependable, hands-free operation for a revolutionized kitchen space. VoicelQ Technology pairs with existing devices to dispense the exact amount of water needed, all with a simple voice command.

The technology is available as a pre-assembled feature on select Delta Trinsic pull-down models with Touch₂O Technology. For an added level of convenience, a retrofit module for VoicelQ Technology will be available to upgrade existing kitchen faucets with Delta Touch₂O Technology manufactured after Jan. 1, 2018. Sloan Extends Custom Design Offering to Commercial Restroom Line with New Graphite Finish

Sloan has added a new graphite physical vapor deposition finish to its existing lineup of aesthetic finishes for any commercial restroom environment. The new custom finish provides a unique, high-contrast palette

across a range of products, including a wide selection of flushometers, faucets and soap dispensers.

Sloan's proprietary PVD special finish process enhances its products' resistance to chemicals and abrasion by bonding at the molecular level. This technology is an essential solution for products subject to commercial wear and tear, and this

process ensures a long-lasting finish when compared to powder or immersion processes. In addition, Basys faucets in polished chrome finish or PVD custom finishes can be customized even further with new laser-etched engravings to add a unique branding element to commercial restrooms. Commercial Faucet Line Balances Durability, Style

With the M-Bition line of faucets, Moen Commercial has achieved a balance of superior durability and attractive design. The faucet is ideal for settings such as healthcare environments where residential-influenced styling adds a personal touch.

In addition to aesthetic appeal, the faucets offer the features needed to ensure lasting, worry-free performance. Key features include adjustable-temperature limit stop with durable brass construction. An ADA-compliant lever handle features embedded hot/cold indicators that won't wear off. In addition, a unique, recessed design protects the aerator from tampering and damage. The LifeShine Classic Brushed Nickel finish is available on select models. [CHECK OR CIRCLE #137](#)

Two-Piece Skirted Toilet Features Contemporary Design, Advanced Cleaning Technology

Kohler recently introduced the Irvine Two-Piece Skirted Toilet. The contemporary skirted design of the toilet makes it the perfect complement to any bath or powder room. The clean and minimalistic profile flows seamlessly from tank to bowl, creating a unique design. It features Revolution 360 flushing technology, which sends water through the bowl for complete coverage, leaving nothing behind. Optional ContinuousClean technology is also available. This integrated automatic cleaning system cleans the bowl with each flush, keeping the toilet cleaner up to five times longer than conventional toilets. [CHECK OR CIRCLE #138](#)
