

Upgrade to a Touch-free Restroom

In applications where hygiene is paramount, such as hospitals and senior or assisted living centers, sensing technology for touch-free activation of commercial plumbing fixtures can be a game changer. Touchless restroom products improve overall hygiene and cleanliness in the restroom, improve user accessibility in compliance with ADA, and conserve water and energy. Check out the public area, staff area and patient room product offerings below, or create your own product package to meet your needs.
