

Sloan Introduces SloanStone® Quartz Molded Sinks

Molded quartz material provides enhanced durability to the SloanStone product line

FRANKLIN PARK, IL (October 26, 2023) – [Sloan](#), the world’s leading manufacturer of commercial plumbing systems, has introduced its new line of [SloanStone Quartz Molded Sinks](#). With an industry-leading minimum of 85% quartz in each color option, the new sinks are some of the strongest and most durable in the market.

“Building owners and architects are always looking for aesthetically pleasing restroom products at an affordable price,” said Morgan Kish, Sloan senior product line manager, sinks, faucets, soap dispensers, and showerheads. “The new SloanStone Quartz Molded Sinks are an excellent choice for those who love the look and feel of a quartz sink while remaining mindful of costs.”

The SloanStone Quartz sinks feature a seamless, non-porous construction that makes for an extremely scratch- and stain-resistant, hygienic, and easy-to-maintain surface. In addition, customers can choose from nine sensor-activated faucet and soap dispenser combos, or mix and match from Sloan’s full faucet and soap offering (the largest in the commercial space).

Many of Sloan’s faucets and soap dispensers are available with PVD finishes for a unique on-deck aesthetic. The new line of sinks features two designs—SloanStone Quartz Gradient (QSGR) and SloanStone Quartz Arrowhead (QSA). The Gradient sinks offer a contemporary design that brings a strong visual presence with a clean form and dramatically angled basin, while the Arrowhead line brings a unique and modern design that comes to a slight point with an open front edge.

Each design comes in both one- and two-station sizes and is available in three distinct colors. Each design also offers two mounting options: mounting brackets or ADA compliant angled stainless steel enclosure.

In addition to the new SloanStone Quartz Molded Sinks, Sloan offers a variety of smart, sustainable sink solutions such as the AER-DEC® Integrated Sink System, Designer Series™, SloanStone Solid Surface, Stainless Steel, and Mobile Handwashing Stations.
