1. Use the index above to find the faucet series and model you need.
2. Go to the page listed where you'll find a picture of the faucet model next to a chart of available sprayheads.
3. The chart is cross-referenced by the flow rates and spray patterns available for each.
4. Sprayheads with the letters "VR" after the model number are Vandal Resistant.
5. In some spaces there is more than one sprayhead listed – a Vandal Resistant model and one that is not.

NOTE: BASYS Faucet flow rates are determined by a flow restrictor in the Solenoid Caddy. To change the flow rate you must also change the Solenoid Caddy.
