Tooshlights®
Smart Restroom Traffic Management System
The new standard of managing restroom traffic.

Any facility that experiences high-traffic periods can significantly increase restroom use efficiency while maximizing social distancing with the Tooshlights® system. In places where customers are pressed for time—like airports, theaters, stadiums, arenas, retail, restaurants, and office buildings—Tooshlights can help optimize stall usage to shorten lines and help visitors **know where to go**.

A smart solution for an efficient restroom.

Enhance your restroom with a complete system that provides valuable performance and usage insights. Tooshlights® shares advanced data with your facility and delivers a streamlined, enhanced user experience by:

- Quickly identifying restroom availability
- Allowing for social distancing
- Optimizing health and wellness with fewer touch points
- Managing traffic to reduce wait times
- Increasing privacy by eliminating under-door peeking
- Providing clean, fully stocked stalls based on facilities’ usage data
- Limiting time spent in an enclosed room or space—only enter if stalls are available

sloan.com/tooshlights
Smart integration for a connected restroom.

Tooshlights® heightens privacy, lowers anxiety, and makes your restroom more efficient. Each kit consists of a smart latch or deadbolt, indicator light, and mount. When paired with the hub and data service, it provides a smart, connected restroom.

Tooshlights Smart Latches and Clear Indicator Lights installed with ceiling mount.

**Indicator Lights**

When the stall is available, the light is green. When the stall is occupied and the smart latch or deadbolt is activated, the light turns red. Blue can be designated for available ADA stalls. It comes with a variety of mounting options.

4 800.982.5839
Data Hub

The Tooshlights® Hub can power and manage up to 30 indicator lights while communicating vital usage and maintenance data via Power over Ethernet (PoE).

The hub can be replaced with a non-data recording power puck option.

Smart Latch or Smart Deadbolt

Tamper-resistant and easy to install, each battery-powered latch and deadbolt wirelessly pairs with an indicator light.
Universal design and applications.

Tooshlights® offers a range of stylish and durable design options that meet the unique needs of your facility. Each Tooshlights kit includes a light, mount, and smart latch or smart deadbolt.

Ancillary accessories such as cable whips and patch plates are sold separately. The data hub or optional power puck are also sold separately. Wall options also available with extended wall mount. Spare parts for lights, latches, deadbolts, and mounts are available at: sloan.com/tooshlights/parts
Smart integration for a connected restroom.

Upgrade your Tooshlights® system to gain insight into your restroom usage. With the data hub and Modus Systems Software subscription, you can view stall, restroom, and facility usage information and analytics.

Check availability
See how many stalls are available or occupied.

Record usage time
Track how long each stall is occupied.

Generate reports
Review daily, weekly, and monthly usage per stall and per restroom.

Receive Alerts
Notification when a stall has been occupied for a specific length of time.
