

Sloan Launches New Faucet and Soap Dispenser Designs
New Pairings Included in Clark and Rush Street Product Collections

FRANKLIN PARK, IL (December 16, 2020) – [Sloan](#), the world’s leading manufacturer of commercial plumbing systems, has announced two new faucet and soap dispenser pairings that are part of its Clark and Rush Street Collections. [Sloan’s new pairings of sensor-operated faucets and soap dispensers](#) are available in five finishes and provide hygienic, touch-free solutions.

“At Sloan, we realize the importance of commercial restroom products that not only leave a positive lasting impression with a high-end aesthetic, but do so while providing a safe and sanitary touch-free environment,” said Kirk Allen, Sloan co-president and CEO. “Our newest faucet and soap dispenser designs continue our mission of helping architects and designers unify their restroom design, all while delivering the highest quality touch-free technology.”

Sloan’s new ETF-410/EBF-415 series faucets pair with ESD-410 soap dispensers, while the ETF-420/EBF-425 series faucets pair with ESD-420 soap dispensers in Sloan’s [Clark and Rush Street Collections](#), respectively. Sloan’s collections series consists of curated products across the entire restroom that share similar aesthetic qualities to enhance cohesive design. With each collection name paying homage to iconic Chicago streets, Sloan’s collections provide a complete product solution for contemporary restroom environments.

Sloan’s Optima[®] ETF-410 Faucet and Sloan[®] ESD-410 Soap Dispenser deliver symmetrically designed smooth curves and defined angles that represent the aesthetics of the Clark Street Collection. Additionally, the Optima ETF-420 Faucet and Sloan ESD-420 Soap Dispenser feature the round forms and sharp angles of Sloan’s Rush Street Collection.

Both the ETF-410/EBF-415 and ETF-420/EBF-425 faucets are available with 0.35 and 0.5 gpm flow rates in both battery-powered or hardwired models and are compatible with the Sloan Optima Control Box for easy installation and Sloan Connect[®] App for wireless monitoring and adjustments. Each soap dispenser is battery-powered and comes with two bottles of 1,500 ml soap, with GOJO[®] refills available at 1,500 and 2,300 ml.

In addition to the finely crafted geometric forms that make each faucet and soap dispenser pairing an aesthetic match, each fixture is available in Sloan’s wide range of special finishes to create a unified restroom experience. Sloan’s Physical Vapor Deposition (PVD) special finishes include Polished Brass, Brushed Nickel, Brushed Stainless, and Graphite to give architects and designers creative flexibility.

Sloan’s entire portfolio of faucet and soap dispenser innovations can be found in Sloan’s new [Faucet and Soap Dispenser Full Line Brochure](#).
