created via: HPDC Online Builder

**HPD UNIQUE IDENTIFIER: 23102** 

CLASSIFICATION: 22 42 13.16 Commercial Urinals

PRODUCT DESCRIPTION: Sloan washdown urinals are white vitreous china exchangeable devices that can be connected to a plumbing system to deliver and drain water and are designed to help conserve water. The representative washdown urinal works with 0.125 to 0.5 gpf (gallons per flush)/0.5 to 1.9 Lpf (liters per flush), is made of vitreous china with a 3/4" top spud, has a 2" NPT outlet flange, and includes a removable strainer, inlet spud, and hanger. Sloan washdown urinals are IAPMO certified to meet or exceed ASME A112.19.2 standards, are WaterSense listed by the US Environmental Protection Agency, and meet ADA guidelines and ANSI A117.1 requirements.

HAZARD TYPE AGENCY AND LIST TITLES WARNINGS

None found No warnings found on HPD Priority Hazard Lists

SUBSTANCE NOTES: This substance is an impurity present in kaolin clay and feldspar. A range in mass percentage is given to represent the worst-case scenario. On this HPD, the substance is part of a ceramic material. Ceramic production melds constituent substances into a single, highly durable material matrix. The listed hazards are not expected to be available under the normal use of this product.

TITANIUM DIOXIDE ID: 13463-67-7

HAZARD SCREENING METHOD:	Pharos Chemical and Materials Library	HAZARD SCREENING DATE: 2020-10-07		
%: Impurity/Residual	GS: <b>LT-1</b>	RC: None NANO: No SUBSTANCE ROLE: Impurity/Residual		
HAZARD TYPE	AGENCY AND LIST TITLES	WARNINGS		
CANCER	US CDC - Occupational Carcinogens	Occupational Carcinogen		
CANCER	CA EPA - Prop 65	Carcinogen - specific to chemical form or exposure route		
CANCER	IARC	Group 2B - Possibly carcinogenic to humans - inhaled from occupational sources		
ENDOCRINE	TEDX - Potential Endocrine Disruptors	Potential Endocrine Disruptor		
CANCER	MAK	Carcinogen Group 3A - Evidence of carcinogenic effects but not sufficient to establish MAK/BAT value		
CANCER	MAK	Carcinogen Group 4 - Non-genotoxic carcinogen with low risk under MAK/BAT levels		

SUBSTANCE NOTES: This substance is an impurity present in kaolin clay and feldspar. A range in mass percentage is given to represent the worst-case scenario. On this HPD, the substance is part of a ceramic material. Ceramic production melds constituent substances into a single, highly durable material matrix. The listed hazards are not expected to be available under the normal use of this product.

# Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

# **Section 4: Accessories**

EPD-04678\_Sloan\_Washdown-Urinals\_050719.pdf

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

HPD URL: No HPD available PLUMBER'S CAULK

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:

Plumber's Caulk is used for the initial installation. No specific or brand name caulk is required, so a general VOC content for Plumber's Caulk is 36 g/L.

# Section 5: General Notes

All of the fixtures covered within this HPD are manufactured in our state of the art, Leadership in Energy and Environmental Design (LEED) Silver, zero municipal water facility in China. This facility was designed to capture rainwater and store it in underground storage tanks where it is then processed to drinking water quality. This water is then used to support the entire engineering center; from test benches and restrooms to showrooms and landscaping. Sloan lavatories are white vitreous china exchangeable devices that can be connected to a plumbing system to deliver and drain water and are designed to help conserve water. Sloan lavatories are made of vitreous china with an overflow, are available for wall-hung or countertop installation, and may include the following options: backsplash, wheelchair access, and 4" (102 mm), 8" (203 mm), or single-hole centerset punching. Sloan lavatories are International Association of Plumbing and Mechanical Officials (IAPMO) certified to meet or exceed American Society of Mechanical Engineers (ASME) A112.19.2 standards and meet American with Disabilities Act (ADA) guidelines and American National Standards Institute (ANSI) A117.1 requirements.

### MANUFACTURER INFORMATION

MANUFACTURER: Sloan Valve Company

ADDRESS: 10500 Seymour Ave Franklin Park IL 60131, USA

WEBSITE: www.sloan.com

CONTACT NAME: Patrick Boyle

TITLE: Director, Corporate Sustainability

PHONE: 847.233.2082

EMAIL: Patrick.Boyle@sloan.com

The listed contact is responsible for the validity of this HPD and attests that it is accurate and complete to the best of his or her knowledge.

## **KEY**

Preparer Third party preparer, if not self-prepared by manufacturer

Applicable facilities Manufacturing sites to which testing applies

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
