A PARKING MANAGEMENT ASSA ABLOY

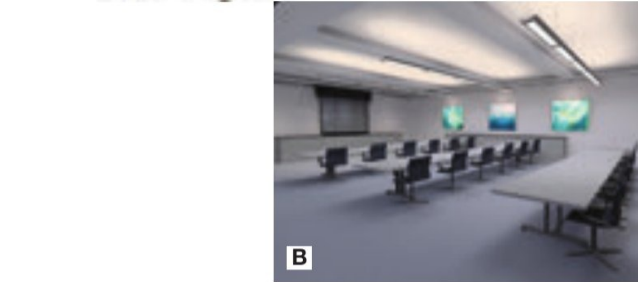

Medeco Nexgen2 Intelligent Locking Solution for parking equipment is a complete access control and accountability solution to protect revenue and data. It is made up of three elements: electronic locks, programmable keys and web-based management software. These elements work together to provide controlled access, accountability, strong physical security, and electronic route management for parking meters and collection equipment.

A

B UVC LIGHTING HUBBELL LIGHTING

SpectraClean 254 upper air disinfection luminaires leverage developments in the disciplines of lighting science and microbiology to combine white and ultraviolet 254 nm light to meet ambient and task lighting requirements while creating a germicidal zone in an upper portion of the room away from occupants. SpectraClean 254 targets the inactivation of airborne viruses, such as SARS-CoV-2 and influenza, with UVC lighting.

B

C CEILING SYSTEM ARMSTRONG WORLD INDUSTRIES, INC.

The 24/7 Defend portfolio includes the AirAssure ceiling panels that self-seal into the ceiling grid to prevent air leaks, and an in-ceiling ultraviolet (UV-C) air purification system. When placed in a standard ceiling grid, the ceiling panels form a tight seal and reduce airflow leakage up to four times more than panels without AirAssure performance.

C

D SCISSOR LIFT JLG INDUSTRIES, INC.

The all-electric DaVinci AE1932 scissor lift features zero hydraulics to help eliminate job site leaks and zero emissions to help control job site pollution. Every component on the scissor is fully optimized, including the control, lift, drive, and steering systems, to reduce the machine's energy consumption by up to 70 percent as compared to a traditional scissor lift. This reduced energy consumption allows for the use of a single, lithium-ion battery.

E SOCIAL DISTANCING BARRIER DRAPER

Clarity Shield is a cleanable, clear vinyl barrier designed to help prevent cross-contamination between individuals in a confined place. A configurable hinge design allows for a multitude of applications. The product provides a safer, sturdier alternative to homemade or improvised setups while remaining lightweight and portable. Configurations allowing up to four people to be separated are available.

F RESILIENT FLOORING LG HAUSYS FLOORS

Atmosphere is a homogeneous sheet solution created to meet the health, safety, and design requirements of healthcare environments. Featuring a chip design, the flooring is available in a palette of 16 colors centered around human wellness and relaxation. The colors can be easily coordinated and grouped together to bring a more dynamic look or functional intent to any space, including lobby and reception areas, as well as patient, treatment, operating, or recovery rooms.

G MOBILE HANDWASHING SLOAN

Mobile handwashing stations are equipped with hands-free, sensor-operated technology for both indoor and outdoor applications. Each station features a sink, foam soap dispenser, touchless towel dispenser, 16-gallon greywater tank, and either a hot water heater or two five-gallon water jug holders. The stations are available as self-contained water or water line-connected. They can be used near entrances or exits, food courts, cafeterias, concourses, concessions, escalators, hallways, and much more.
