

Sloan AER-DEC® Integrated Sinks Now Available with BASYS®, Clark Street®, or Rush Street® Fixture Offerings

Innovative handwashing station expanded to deliver additional architectural, aesthetic choice to commercial restroom design

FRANKLIN PARK, IL (September 26, 2023) – <u>Sloan</u>, the world's leading manufacturer of commercial plumbing systems, has expanded its <u>AER-DEC Integrated Sink</u> offering to now include two new fixture style options, the Clark Street and Rush Street style fixtures, in addition to the iconic BASYS® style fixtures.

With a soap dispenser, faucet, hand dryer, and sink basin all designed to work together as one touch-free, hygienic, and highly efficient system, the AER-DEC reduces the risk of slip and fall caused by water on the restroom floor from dripping hands and wet paper towels.

Since its launch in 2015, the AER-DEC has solely been available with Sloan's BASYS style fixtures. With the addition of the Clark and Rush Street style fixture options, architects and facility managers now have access to new AER-DEC fixture designs that provide additional elegant aesthetic options.

Inspired by prisms, Sloan's Clark Street fixture design is geometric and faceted to refract light for a unique aesthetic. Sloan's Rush Street fixture design is inspired by industrial forms and brings together soft corners, cylindrical shapes, and rounded edges to create a simple, round aesthetic with a streamlined look and feel.

"For years, Sloan's AER-DEC Integrated Sink offering has provided restroom occupants with a simplified handwashing process, all within arm's reach," said Morgan Kish, Sloan senior product line manager, sinks, faucets, soap dispensers, and showerheads. "We are proud to extend that offering to include two additional sets of aesthetic options for the design community with the addition of our Clark Street and Rush Street style fixtures to fit all high-end commercial applications."

AER-DEC Integrated Sinks can be customized to meet any restroom environment with options including LED lighting in the sink basin, beveled or rounded sink edges, multiple sink heights, additional countertop spacing, and more. AER-DEC Sinks provide hundreds of deck and basin options in Corian[®], Corian Quartz, Caesarstone[®], and Silestone[®], along with 300-plus Wilsonart[®] laminates or standard stainless finishes. Customize and view your AER-DEC design in real time with Sloan's <u>Sink Configurator</u>.

All AER-DEC fixtures are available in five Sloan finishes including polished chrome, as well as PVD finishes in brushed stainless, polished brass, brushed nickel, and graphite.
